

OFFICIAL WHITEPAPER PRESENTATION

MEMEX

AI

Decentralized Intelligence on the XEP Network

Bridging the gap between Crypto and Artificial Intelligence. A scalable ecosystem for AI data processing and model sharing, powered by the lightning-fast Electra Protocol.

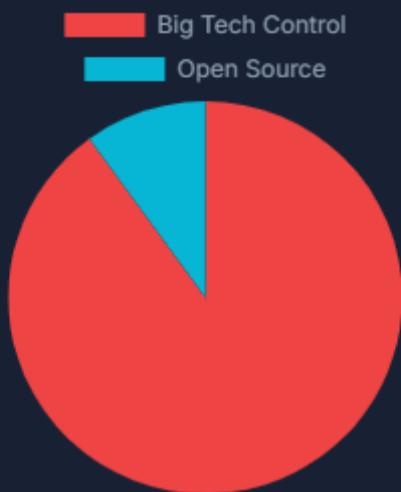

Market Analysis

THE PROBLEM: CENTRALIZED MONOPOLIES

Global Data Control

"Big Tech" vs. Open Web

⚠️ Data Monopolies

OpenAI, Google, and Meta control nearly **90%** of accessible high-quality datasets.

💰 Rising Costs

GPU compute costs for training models are increasing by **300%** annually.

⌚ Scalability Limits

Standard blockchains (ETH, BSC) have high gas fees, blocking AI micro-transactions.

The Solution

WHY XEP NETWORK?

Near-Zero Fees

Essential for millions of AI micro-transactions.

Instant Finality

Real-time confirmation for real-time AI agents.

Green AI

Eco-friendly consensus mechanism.

Network Performance Comparison

Memex AI (XEP) Traditional L1

Tokenomics

TOTAL SUPPLY: 300,000,000,000 MEMEX

LOCKED RESERVE (66.6%)

200 Billion

BURN POOL (16.7%)

50 Billion

LIQUIDITY (16.7%)

50 Billion

20-MONTH VESTING RELEASE SCHEDULE

Controlled release of 5% per month ensures market stability.

Strategic Roadmap

THE PATH FORWARD

PHASE 1 (MONTHS 1-3)

Inception & Launch

- Concept Design & Whitepaper
- Token Creation on XEP Network
- Website Launch & Community Building
- Initial Liquidity Provision (50B)

PHASE 2 (MONTHS 4-8)

Development

- CoinGecko & CMC Listing
- Centralized Exchange (CEX) Listing
- "Memex Node" Beta Release
- First Burn Event (5B Tokens)

PHASE 3 (MONTHS 9-14)

Expansion

- First Vesting Unlock (Market Makers)
- AI Marketplace Launch
- Mobile Wallet Integration

PHASE 4 (MONTHS 15+)

Maturity & DAO

- Full DAO Governance
- Layer-2 Solution Research
- Enterprise API Partnerships
